

J. D. G. No. 1

I was much interested in the news of the
Famyon, when the Rail Road is compl-
-eted Coal may take the place of Wood
to a great extent. I am sorry the Creek
is so completely filled up, I think the
water must have cut in the Hills
above Bro Hinmans & washed the
Gravel from there & the Water Sect
I hope the school house that is
taking the place of Bro Millers Domi-
-cile is completed, which I hope to
hear more of at another time.

I suppose the Turbine Wheel arrived
safe I am sure Father has much
to see to in Building the Mill
in Weeber valley besides so much
else to do you must have had
some Slipery Road in the Famyon
as the Snow seems to have fallen
rather Early this year. I hope the
Association are progressing finely
please remember me kindly to
them & tel them to keep up their
good Name which they have so well
